Education

Galotias University   **Greater Noida, Uttar Pradesh**

Bachelor of Computer Application   September/2020 – May/2023

St. Clare's Sr. Sec. School Agra   **Agra, Uttar Pradesh**

12th (Commer+IP)   May/2019 – June/2020

Skills Summary

- ReactJs, JavaScript, TypeScript, Zustand, React Query, Redux, NodeJs, ExpressJs, NestJs, MUI, Tailwind
- MongoDB, Firebase, MySql
- Understanding of creating a common components to reduce code load
- Good understanding on the software development life cycle.
- Fluent communication and interpersonal skills

Work Experience

ReactJs Engineer| June2024 – Present (1 year)
BITCS

I am currently working on an online casino platform inspired by websites like Stake. The project offers a wide variety of casino games, including slots, blackjack, roulette, and live dealer experiences, all designed to deliver a seamless and engaging user experience. The platform includes features such as user authentication, secure payment integration, reward systems, real-time game updates, and affiliate program support. It is built with scalability and performance in mind to handle high user traffic efficiently.

ReactJs Developer | June 2023 - June 2024 (1 year)
Vega6 Webware Technologies Pvt. Ltd

I contributed to the development of an AI-powered video editing platform designed to streamline content creation. The tool enables users to generate videos from simple text prompts using AI, significantly reducing production time. Additionally, it offers features for customizing the generated content and automating the scheduling and publishing of videos across multiple social media platforms. The platform also supports white-labeling, allowing clients to rebrand and resell the software as their own.

ReactJs Intern | September 2022 - Feburary 2023(6 months)
Thinkbiz Technologies Pvt. Ltd

I worked on an internal software solution that enabled the company to efficiently track employees' work activities, project assignments, personal details, holidays, and internal communications such as emails. As part of the development team, I gained hands-on experience in building and implementing reusable components to ensure consistency and maintainability across multiple modules within the application. This project helped me strengthen my skills in designing scalable UI components and optimizing workflows for enterprise use.
